***DETAILED ACTION***

1. In response to the communication dated 03/29/2006, claims 55-69 are pending in this office action as the result of the cancellation of claims 17-25, 27-35, 37-45, 47-48, 50-51 and 53-54 and the addition of claims 55-69.

2. This application is a Division of 09/632,212 filed on August 03, 2000 now patent number 6,782,387.

***Abstract***

3. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. **The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.**

**The language should be clear and concise** and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc. (Emphasis added).

***Acknowledges***

4. Receipt is acknowledged of the following items from the Applicant:

- The applicant's amendment has been considered and made of record.
- Information Disclosure Statement (IDS) filed on 12 April 2006 and made of record. The references cited on the PTOL 1449 form have been considered.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 55-69 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 55-69, the language in these newly added claims is incomprehensible, in particular the function of the document name generating part. As present, the language describes an incoherent function, thereby rendering it difficult to follow. The Examiner finds it impossible to search for appropriate prior art.

Regarding claims 55-59, these claims are incomplete for omitting essential structural cooperative relationships of elements. See MPEP § 2172.01. The omitted structural cooperative relationships are: components such as a document managing part, a document data coupling control part and a document name generating part are not connected to each other. Each of components recites non-related and separated functionality.

Regarding claim

Regarding claims 60-69, these claims are incomplete for omitting essential cooperative relationships of elements. See MPEP § 2172.01. The steps of managing, controlling and causing are not connected to each other.

***Conclusion***

Art Unit: 2163

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
